FIREWORKS POLICY

Purpose

GBGB recognises that loud and high-pitched fireworks can have a negative impact on canine health and wellbeing. This policy aims to safeguard greyhound welfare by minimising the exposure of racing greyhounds to fireworks during race and trial events and during transportation to and from GBGB-licensed racecourses.

Scope

The GBGB Firework Policy is to be followed by all licenced persons responsible for protecting greyhound welfare in relation to fireworks.

Racing greyhounds may be exposed to firework displays in various locations, including at their residential kennels, during transportation and while at a racecourse. This Policy identifies the periods throughout the year where there is an increased risk of exposure to fireworks and states the additional mitigation that needs to be applied to uphold greyhound welfare during those periods.

If unavoidable exposure to fireworks does occur while greyhounds are at a racecourse, this Policy sets out the emergency measures that racecourse and trainers must follow to minimise any potential negative welfare outcomes for the greyhounds onsite.

Risk assessment of exposure to fireworks for racing greyhounds

HIGH-RISK

- The 5th of November (Guy Fawkes Night), where racing is scheduled to continue past sunset.
- The Friday, Saturday and Sunday evenings of the nearest weekends to the 5th of November where racing is scheduled to continue past sunset.
- Known major public firework displays or other local events taking place adjacent to a stadium, which may occur at any other time of the year.

MEDIUM-RISK

- The evenings of the other weekends around 5th November, where racing is scheduled to continue past sunset.
- 31st December where racing is scheduled to continue past sunset.
- Key events such as Diwali, Chinese New Year, etc. in areas where the local population profile applies.

LOW-RISK

- Bank holidays and weekends throughout the year.
- Key events such as Diwali, Chinese New Year, etc. in areas where the local population profile does not suggest the likelihood of displays.

Policy

- There will be no conventional fireworks displays at a GBGB licensed racecourse while greyhounds are present at the racecourse.
- Every effort must be made to avoid scheduling greyhound race and trial events during periods identified as high-risk for firework displays.
- Racecourses shall look to schedule racing times and meetings to avoid any local displays or exposure. The necessity for levels of mitigation action changes from racecourse to racecourse depending on their local population profile.

- For racecourses with resident greyhounds nearby, special efforts shall be made to identify and understand the risk in advance of firework displays near the stadium so that efforts can be made to minimise the impact of fireworks on these greyhounds.
- If unexpected firework noise occurs, stadia management and the veterinarian on duty must consult as to how to minimise the impact on the greyhounds and should consider cancelling meetings where noise levels are high or sustained. The following emergency measures must be taken:
 - o All greyhounds must be held within the kennel area until the management are confident that the display is over.
 - o If greyhounds are out on the track when the noise starts, they must return to the kennel area immediately. The race should not go ahead unless the greyhounds have already been placed in the traps before the firework noise begins.
 - o The track veterinarian shall be consulted as to whether racing may continue once the display is over, based on the perceived impact of the display on the dogs and the period the greyhounds have already been kennelled.
 - o Kennel staff shall implement measures within the kennels to minimise the impact of noise on the greyhounds. This may include playing other sounds in the kennels such as radio or music to mask firework noise, providing additional bedding or draping blankets over kennel doors to allow hiding. Close monitoring of all greyhounds is key throughout the period of noise.
 - o Kennel staff and the track veterinarian shall take note of any greyhound(s) showing signs of anxiety and/or fear. These dogs shall be examined carefully by the veterinarian and withdrawn from racing if deemed necessary by the track veterinarian.
 - o If racing does continue after the display, all greyhounds shall be inspected by the veterinarian before being deemed fit to race.
 - o No greyhound shall be permitted to leave the kennel area while the fireworks are going off (i.e., being moved into vans).
 - o For greyhounds already in vans, trainers shall stay with them and implement measures to minimise the impact of the fireworks on the greyhounds (e.g., close the doors, turn on the engine, radio, etc.). Once all greyhounds are loaded, the trainer may leave to remove the greyhounds from the situation.

Additional recommendations for racecourses

- Stadia management should engage with their local authority and adjacent businesses to improve their knowledge of local firework displays so that unexpected exposure to displays is minimised.
- Racecourses should avoid holding conventional firework displays outside times of GBGB licensed activities where there are residential properties, kennels, horses or farm livestock immediately adjacent to the stadium. This reflects their understanding of the impact of conventional fireworks on other domestic animals and wildlife.
- Racecourse management should remain aware of the risk of negative effects on health and welfare should greyhounds be exposed to the debris and remnants of any spent fireworks that may have travelled into the stadium.

GBGB TO HOST ANNUAL TRACK VETS' CONFERENCE

The Greyhound Board of Great Britain (GBGB) will host its annual conference for racecourse veterinarians on 8 October at Nottingham Greyhound Stadium.

All GBGB-licensed racecourse veterinarians are encouraged to attend this free event, which will bring together veterinary professionals from across the sport for a day of presentations, discussion and knowledge sharing.

The GBGB is delighted to be welcoming guest speaker Dr John Katakasi BVSc (Hons), CVA, CVCHM, who will lead a session on examination techniques for racing greyhounds.

Dr Katakasi has held a variety of roles within the Australian greyhound racing industry, including serving as a Director of Greyhound Racing South Australia for three years during a period of significant positive change for the sport. He is widely recognised for his work in educating trainers and veterinarians on best-practice training methods, clinical examination techniques and the early identification and management of health issues.

Alongside Dr Katakasi's presentation, delegates will receive a range of regulatory updates from the GBGB, including a talk by Regional Regulatory Veterinary Surgeon (RRV) Barry Sangster, who will reflect on the first year of RRV-led annual veterinary kennel inspections of greyhound trainers' kennels in his area.

Dr Richard Payne, Associate Professor at the University of Nottingham and Scientific Adviser to the GBGB, will also provide an update on the GBGB's Disease Surveillance and Monitoring Programme (DSMP). The programme is a national initiative that monitors and gathers data on diseases and sudden deaths within the racing greyhound population, helping to strengthen the evidence base that supports welfare and veterinary care across the sport.

The conference is free to attend and open to all GBGB-licensed racecourse veterinarians.

To register, please contact Meriel France, GBGB Learning and Development Manager, at meriel.france@gbgb.org.uk.

TRAINER NOTICE: LEPTOSPIROSIS VACCINATIONS

From **1 January 2027**, proof of a correctly completed Leptospirosis 4 (L4) vaccination course will be required for all GBGB-registered greyhounds.

Before this date, greyhounds currently vaccinated with L2 must transition to the L4 vaccination.

To achieve effective L4 immunity, a primary vaccination course requires two L4 doses administered within the interval specified by the vaccine manufacturer (typically 3 – 4 weeks apart), followed by an annual L4 booster vaccination.

For greyhounds currently protected by L2 vaccination, the first L4 dose can be administered when their annual leptospirosis booster is due. The second L4 dose must then be given within the interval recommended by the attending veterinary surgeon.

If a greyhound has not yet started the transition to L4 vaccination and its annual booster is due after 1 January 2027, you should arrange for them to complete the primary L4 course before this date.

To avoid delays in GBGB registration, trainers purchasing greyhounds from the Republic of Ireland should ensure that rabies, core (DHP/DHPPi) and L4 vaccination courses are fully completed and up to date before travel. You should obtain evidence of the greyhound's full vaccination history, signed by the attending veterinary surgeon.

Greyhounds purchased from Northern Ireland do not require a Pet Passport. However, proof of up-to-date core vaccinations and leptospirosis vaccination must be provided, including evidence of a completed primary leptospirosis vaccination course where an annual leptospirosis booster has been recorded.

Please take this opportunity to check your vaccination records. If you have any questions regarding this notice or GBGB's vaccination requirements more generally, please contact your RRV.
