RACING ROUND UP

All the big race action from the last 14 days.

Droopys Plunge caps emotional week for Janssens with Coral Gold Collar triumph

Former English Greyhound Derby champion Droopys Plunge rolled back the years in style at Hove on Sunday, producing a dominant front-running performance to land the £10,000 Coral Gold Collar Final for Patrick Janssens and the Three Tall Men Syndicate.

Vhagar dominates George Curtis & Ballyregan Bob Memorial Final at Hove

Vhagar produced another display of front-running excellence at Hove on Saturday night as Mark Wallis's outstanding stayer powered to victory in the George Curtis & Ballyregan Bob Memorial Final.

Bretons Girl makes history in inaugural SIS Sprint Trophy

Bretons Girl wrote her name into the Harlow record books with victory in the first-ever SIS Sprint Trophy final, producing a sharp front-running display to land the two-bend decider in 15.19sec.

Underground Gold sets Eclipse standard with dazzling 28.98 heat victory

Underground Gold produced the standout performance of the opening round of the Premier Greyhound Racing Eclipse at Nottingham on Monday night, storming to a seven-length success in 28.98 as 18 greyhounds booked their places in next week's semi-finals.

100 YEARS ON TRACK: NEW WEBSITE CELEBRATES A CENTURY OF GREYHOUND RACING IN BRITAIN

A new website shining a spotlight on a century of greyhound racing in Great Britain has been launched today.

As the sport's centenary year draws to a close, the **100 Years on Track** website has been created by the Greyhound Board of Great Britain (GBGB) as a lasting legacy of the celebrations.

Serving as a new digital home for greyhound racing's rich heritage and memorabilia, the website launches with a collection of historic photographs, artefacts and personal stories from across the decades. As further contributions are made by owners, trainers and racing enthusiasts, it will continue to evolve into a comprehensive archive of the sport's history.

Greyhound racing has played a significant role in British sporting life since the first race took place at Belle Vue, Manchester, in 1926. The new website charts the sport's remarkable rise and its place in British social history, illustrating how it has endured and evolved through decades of war, recession, prosperity and profound social change.

Showcasing iconic greyhounds, champion trainers and legendary races from across the decades, the site brings together the stories that have helped define greyhound racing's first century. It also reflects a sport that continues to evolve, embracing technological innovation and advances in welfare as it looks ahead to its second century.

The website also features a growing digital archive of memorabilia and objects of historical interest, creating a permanent home for the preservation of the sport's heritage. Visitors are encouraged to contribute their own artefacts and memories to help build this unique collection for future generations.

Cress Lee, GBGB Marketing Manager, said:

"We hope this website will appeal both to current fans of greyhound racing and to those who would like to learn more about its important and enduring role in Britain's sporting and social history.

"It goes without saying that the greatest greyhounds and trainers from across the decades take centre stage in telling the story of the sport, and we hope that this website helps ensure their achievements and contributions are never forgotten."

Greyhound racing journalist and presenter, Jonathan Hobbs, said:

"It was a pleasure to be involved with the GBGB in the creation of this new website, and I hope fans will take the time to explore it.

"One of the joys of greyhound racing is the wealth of stories it has produced over the years. Whether it's legendary champions, standout races or larger-than-life characters, this site allows people to discover what has made greyhound racing so special to generations of fans."

GBGB welcomes submissions from owners, trainers, supporters and racing enthusiasts. If you have a photograph, artefact, piece of memorabilia or other item of historical interest that you would like to contribute to the *100 Years on Track* archive, please email: **info@gbgb.org.uk.**

TRAINER NOTICE: LEPTOSPIROSIS VACCINATIONS

From 1 January 2027, proof of a correctly completed Leptospirosis 4 (L4) vaccination course will be required for all GBGB-registered greyhounds.

Before this date, greyhounds currently vaccinated with L2 must transition to the L4 vaccination.

To achieve effective L4 immunity, a primary vaccination course requires two L4 doses administered within the interval specified by the vaccine manufacturer (typically 3 – 4 weeks apart), followed by an annual L4 booster vaccination.

For greyhounds currently protected by L2 vaccination, the first L4 dose can be administered when their annual leptospirosis booster is due. The second L4 dose must then be given within the interval recommended by the attending veterinary surgeon.

If a greyhound has not yet started the transition to L4 vaccination and its annual booster is due after 1 January 2027, you should arrange for them to complete the primary L4 course before this date.

To avoid delays in GBGB registration, trainers purchasing greyhounds from the Republic of Ireland should ensure that rabies, core (DHP/DHPPi) and L4 vaccination courses are fully completed and up to date before travel. You should obtain evidence of the greyhound's full vaccination history, signed by the attending veterinary surgeon.

Greyhounds purchased from Northern Ireland do not require a Pet Passport. However, proof of up-to-date core vaccinations and leptospirosis vaccination must be provided, including evidence of a completed primary leptospirosis vaccination course where an annual leptospirosis booster has been recorded.

Please take this opportunity to check your vaccination records. If you have any questions regarding this notice or GBGB's vaccination requirements more generally, please contact your RRV.

KENNELHAND QUALIFICATION

Ready to take the next step in your career?

GBGB is offering full-time licensed kennelhands the opportunity to gain a fully funded qualification that supports their day-to-day role and helps promote the highest standards of greyhound care and welfare.

Build your knowledge, develop practical skills and achieve the **City & Guilds Level 2 Certificate of Technical Competence in Animal Health, Husbandry and Handling**.

About the programme

- Open to all experience levels
- Develop the skills and knowledge needed to support excellent greyhound health, care and welfare
- Gain a recognised, transferable qualification
- Flexible online learning combined with hands-on workplace experience
- Study at your own pace around your daily duties
- No written exams
- Fully funded by the GBGB, free for both kennelhands and employers

The Disciplinary Committee was in attendance on 22 July 2025.

1 **Yarmouth Stadium: Mr Paul Rea (DIVINE FAITH)**

Rules 174 (i) (b), 217, and 152 (i)

Professional Trainer Mr Paul Rea was found to be in breach of Rules 174 (1) (b), 217 and 152(i) of the GBGB Rules of Racing after a urine sample taken on 1st December 2024 from his greyhound, DIVINE FAITH, at Yarmouth Stadium tested positive for the presence of 5-hydroxytryptophan.

Mr Rea attended the meeting by video link as did Independent Scientific Advisor to the GBGB, Professor Tim Morris.

The Committee heard that a random sample was taken from DIVINE FAITH before an A4 462m Flat race in which it started as 6/5 favourite and finished 4th beaten by 8½ lengths. On analysis by LGC Laboratories the sample tested positive for the presence of 5- hydroxytryptophan.

Independent Scientific Advisor Professor Tim Morris told the Committee 5-hydroxy tryptophan is not available as a veterinary medicine, but is available in nutritional supplements taken by people and also marketed for use in animals including dogs. It is not a natural constituent found in food but the amino acid tryptophan which is found in many foods is converted in the body into 5-hydroxy tryptophan which is then converted into serotonin. 5-hydroxy tryptophan increases serotonin concentrations in the nervous system, affecting sleep, cognition, behaviour, temperature regulation, appetite and motor activity. Side effects can include seizures, diarrhoea, abdominal pain and transient blindness. By its sedating and stimulating effects and its range of adverse effects it is a substance which by its nature could affect the performance and prejudice the wellbeing of a greyhound. Its effect on a racing greyhound would be to slow it down.

Professor Morris noted that in December 2021 the GBGB had issued "Important Advice to Trainers", warning about the use of human supplements claiming to be from natural sources whether for health reasons or in an attempt to affect a greyhound's performance. It warned that Trainers risked positive sample results and being in breach of the Rules but could also be putting their dogs at risk from the side effects of substances in the supplements. It identified 5-hydroxy tryptophan as a substance that could be fatal for greyhounds. Professor Morris also noted that the GBGB Trainer Guide to Medication Control warned that many supplements, herbal preparations and "natural" remedies contain banned substances and that veterinary advice should be sought before such products were administered to a racing dog.

Mr Rea told the Local Inquiry held on 21 January 2025 that he had no idea how 5-hydroxy tryptophan had come to be in DIVINE FAITH. Its kennelmate was at the time being given an antibiotic and a painkiller in its food and they were fed together unsupervised in their kennel. Mr Rea had been using a painkilling gel on his back but said he was careful to wash his hands after applying it. He described the dog's usual diet and said that at the time he had been feeding raw eggs and raw meat because he had been unable to cook his greyhounds' food. Photographs were produced of the two vitamin and mineral supplements he was giving to his greyhounds. This medication, food and supplements were the only possible sources he could think of for the substance.

Professor Morris's evidence was that none of the medications being given to the greyhound's kennelmate or featuring in the kennel's Treatment Book or being used by Mr Rea were a possible source of the 5-hydroxy tryptophan. The substance was produced naturally from tryptophan which is found in many foods. But at about 5.5 µg/ml, the level of 5-hydroxy tryptophan found in the sample taken from DIVINE FAITH was similarto the level found in scientific experiments when a greyhound had been given a 50mg dose of 5-hydroxytryptophan. In the Professor's opinion it was physiologically implausible that the substance in this amount came from DIVINE FAITH's food. The levels detected were consistent with one 50gm tablet of 5-hydroxy tryptophan being administered up to 8 hours before the sample was taken, more likely between one and five hours.

In evidence to the Committee Mr Rea repeated that he would never knowingly give any of his greyhounds anything that could harm them. He said that before this positive sample he had never heard of 5-hydroxy tryptophan or heard of trainers using supplements containing it to calm nervous dogs or to stop dogs. DIVINE FAITH was a good traveller and he had never used any medication or substance to calm nervous travellers. He had no reason to want to stop DIVINE FAITH. He knew that the dog's owner had backed it, making it the favourite.

It had only not won because it was badly blocked at the third turn, leaving it well behind the field. Despite this it had recovered to finish 4th Mr Rea said he was not aware that one could lay a dog to lose. He had complete faith in all his kennel staff.

The Committee found it clearly established that DIVINE FAITH had raced on 1 December 2024with the proscribed substance5-hydroxytryptophan in its system and that this was the result of that substance being administered to the dog, probably at Mr Rea's kennels. On the evidence this was unlikely to have been a case of the dog being given the substance innocently, for example in a supplement that was not known to contain it. However, the Committee found Mr Rea to be an honest witness and could not find that he consciously took part in or was aware of the substance being given to the greyhound. Accordingly, he was in breach of Rules 174 (1) (b), 217 and 152 (i) but not Rules 174 (1) (a) or 152 (ii). In all the circumstances the appropriate sanction was that Mr Rea receive a reprimand and pay a fine of £300.

2 **Suffolk Downs Stadium: Mr Jim Daly (JAYMIR LAD)**

Rules 174 (i) (b), 217, 152 (i)

Professional Trainer Mr Jim Daly was found to be in breach of the GBGB Rules of Racing after a sample taken from his greyhound JAYMIR LAD at Suffolk Downs Stadium on 8th January 2024 tested positive for the presence of norethisterone and metabolites of norethisterone.

Mr Daly was in attendance by video link, as were Nottingham Stadium's Racing Manager, Peter Robinson, and Independent Scientific Advisor to the GBGB, Professor Tim Morris.

The Committee heard that on 8 January 2024 a random urine sample was taken from Mr Daley's greyhound JAYMIR LAD at 3.41 pm before it ran in the 4th race at Suffolk Downs Stadium, a 388m A3 contest in which it finished 6th by 9 lengths. On analysis by LGC Health Sciences, the sample tested positive as containing the presence of norethisterone and its metabolites 5 a-estran-17a-ethynyl-313, 1713-diol and 5f3-estran-17a-ethynyl-3a, 1713-diol (alternatively, norethisterone and two metabolites of norethisterone).

Professor Morris's evidence was that norethisterone is not available as a veterinary medicine but is an authorised human medication that is prescribed under the cascade and widely used to provide long-term suppression of oestrus in female greyhounds. It has anabolic effects, especially at higher doses. When given to male dogs it can have adverse female sex steroid effects. In female dogs it can have a slight adverse effect on performance. In the Professor's opinion it was a substance which, when given to ma le dogs, could affect the performance of the greyhound or prejudice the wellbeing of the greyhound.

Professor Morris said the presence of norethisterone and two of its metabolites in the sample indicated that the probable source was an ingestion of norethisterone. The level of norethisterone found in the sample was consistent with the norethisterone being ingested within 24 hours before the sample was taken.

Mr Daley told the Local Inquiry held on 8 April 2024 that he suppressed about 95% of the bitches in his kennels. Each greyhound had a named bowl, with bitches having smaller bowls than the male dogs. The greyhounds were fed separately, either in their kennel or in a paddock. JAYMIR LAD had never shared a kennel and was always kennelled on its own. Mr Daley had no idea how norethisterone could have got into the greyhound in his kennels. He accepted that even with precautions in place, a mistake could have been made.

In a written statement and in his evidence before the committee, Mr Daley said that he appreciated suppressant-positive samples in male greyhounds were typically the result of feeding error or accidental contamination in the home kennels. But he had a strict and robust feeding system in place, he said, and believed the norethisterone in JAYMIR LAD could have come from a poor cleaning regime at the stadium kennels or as a result of a lack of security at the stadium kennels.

Mr Daley contended that low staffing levels at the stadium were the cause of poor cleaning standards. For example, he said, rubber mats that were effectively used as bedding were in continuous use in the kennels and only mopped over. There had been times when the kennels appeared not to have been cleaned out at all. He said he had once kennelled a dog and found dog faeces in a water bowl left from a previous meeting.

On security, Mr Daley claimed that at every meeting the rear gates to the greyhound paddock were left open, so that there was free access to unlicensed persons to enter from the car park. Trainers, track staff and members of the public who used a tea room during meetings walked through the area of paddock by the stadium entrance where greyhounds waited before going out to the race track. The racing kennel was often manned by a single stadium staff member, he said, and the racing kennels would be left unlocked and unmanned for periods of time while greyhounds were parading for a race.

In evidence before the Committee, Mr Daley said his racing greyhounds were only fed a small breakfast of pre-soaked biscuit on race days, from a very small bowl. There were 30 different sized paddocks in which greyhounds were fed on his 8 acre kennels site. But on race day mornings all greyhounds that were racing, dogs and bitches, were fed in succession in the same small, 3 metre-square paddock. Bitches were not fed their suppressant tablet in this meal, so that the last meal at which racing bitches being fed in that paddock before and after JAYMIR LAD would have been given their suppressant was in their breakfast on the day before, 7 January 2024. Mr Daley said the cleaning regime at the kennel included cleaning any vomit or faeces from the small race day feeding paddock but, he said, faeces tended not to be cleaned out before the end of the feeding session. There could have been faeces in the small paddock when JAYMIR LAD was fed there on 8 January 2024. Mr Daley said his greyhounds were not normally muzzled in his kennels and nor were they muzzled at the track, except when racing. JAYMIR LAD was not known as habitually eating faeces.

Professor Morris's evidence to the committee was that JAYMIR LAD could have ingested norethisterone resulting in the positive sample, including by eating faeces or vomit from a suppressed bitch, but that the bitch would have had to have been given norethisterone 6 hours or less before vomiting or longer if from faeces. He said the levels of norethisterone and metabolites detected in the sample taken pre-race on 8 August 2024 were probably not accounted for by JAYMIR LAD eating the suppressant put in a breakfast intended for one of Mr Daley's bitches the day before, 7 August 2024.

The Committee considered it fanciful that the norethisterone and metabolites found in JAYMIR LAD's sample were the result of norethisterone being malevolently or mischievously administered to the dog at the track or of anyone inadvertently exposing the dog to the substance by dropping or mislaying a norethisterone tablet. Even if Mr Daley's contentions about cleanliness at the stadium were correct, which the Committee was not in a position to decide, by far the most likely and the probable source was a feeding mishap in Mr Daley's kennel or, albeit

less likely, exposure of JAYMIR LAD to norethisterone in faeces from a suppressed bitch in the kennels.

Accordingly, the Committee found Mr Daley in breach of Rules 174 (1) (b) and 217 and, by virtue of those breaches, Rule 152 (i). The Committee accepted that Mr Daley had set up a system of feeding that included reasonable precautions against any greyhounds other than suppressed bitches being exposed to norethisterone, so that his culpability was comparatively low. Nevertheless, the system had failed and it was the responsibility of the trainer to see that it did not. The appropriate sanction was that Mr Daley receive a Caution and pay a fine of £300.

The Disciplinary Committee was in attendance on 24 July 2025.

1 **Mr Kenneth Bowman**

Rules 18. 174 (vi). 152 (i) and 152 (ii)

The Disciplinary Committee convened to consider the report of a local inquiry held by the area stipendiary steward on 15 October 2024. Mr Bowman attended by video link, accompanied by Helena Wrigglesworth, area stipendiary steward, and Martin Race, racing manager for Doncaster were also in attendance.

The GBGB, represented by Mr Andrew Weston, presented evidence that the retirement forms for BREAKADAY EBONY and BREAKADAY JET, dated 6 March 2024, listed the new owner as Person A at an address in Armthorpe, Doncaster. A home check on 25 March 2024 by Stipendiary Steward Helena Wrigglesworth and Investigation Officer Chris Hufton found the address to be a derelict plot on a traveller's site with a horse box on it. A resident confirmed no Person A lived there and there were no greyhounds on site. A check of the postcode led to a different address, where the occupant denied being Person A or knowing Mr Bowman.

Mr Bowman stated he was introduced to Person A via another trainer. He claimed Person A and his mother visited his kennels, and he then followed Person A and his mother to deliver the dogs to a house in Armthorpe. He felt this property was appropriate for retired greyhounds, with a fenced garden and converted sheds. This house was not the address on the form or the location pictured in evidence. He stated he could not retrace his route to the property. He admitted he did not provide vaccination cards or muzzles. The bitches had not been neutered prior to rehoming.

The GBGB presented evidence that the retirement form for BULLRUN RUBBLE, dated 10 May 2024, stated the dog was re homed to Person Bat an address in Wakefield. A visit to this address on 26 June 2024 by Ms Wrigglesworth and Mr Hufton found a derelict house with no signs of occupation or any greyhound.

Mr Bowman stated he was also introduced to Person B by another trainer. He admitted he did not perform a home check, allowing Person B to take the dog from the kennels after a brief meeting as he was preparing for a race. He admitted not obtaining a correct phone number for Person Band not providing a muzzle. The bitch was not neutered prior to rehoming.

He acknowledged he was aware of the rehoming policy and that pressure to reduce dog numbers at his kennels was a factor in his lapse of judgement. The whereabouts and welfare of all three greyhounds remains unknown. Mr Bowman stated that he did have a means to try to ascertain the whereabouts of the greyhounds, but he had not thought to do so because he was aware that the GBGB welfare department were investigating and would resolve the matter. He told the committee he had rehomed dogs since this time and now insists that new owners provide him with photo updates of the rehomed dogs. He told the committee that he would now rehome dogs via established charities.

The committee found Mr Bowman's evidence to be unreliable. His statement regarding visiting a suitable property for BREAKADAY EBONY and BREAKADAY JET, the location of which he now cannot recall, was not accepted, and the completed re homing forms were deemed to contain false statements. It was clear that he had seriously failed in his responsibilities to arrange a suitable home for BULLRUN RUBBLE, he had admitted to handing a dog to a stranger with no regard for its welfare. The committee found breaches of rules 18, 174(vi), 152(i), and 152(ii).

The committee considered Mr Bowman's representation that, at the time of the incidents, he had been under significant personal strain and that his efforts to improve his kennels had been recognised by his stipendiary steward. However, there could be no excuse for the failure in his duty of care to these dogs and a two-year disqualification was imposed. No fine was imposed.

2 **Star Pelaw Grange: Mr Peter Richardson (HURLEYS SPRING)**

Rules 174 (i) (b), 217, 152 (i)

The Disciplinary Committee convened to consider the report of a local inquiry held by the area stipendiary steward on 18th October 2023. Mr Richardson attended by video link, as did Mr David Gray (Track rep, Star PelawGrange).

The committee heard that on 27th August 2023, HURLEYS SPRING competed in race three at Pelaw Grange Stadium, which started at 12:13. This was a 435-metre, grade A2 flat race. He ran from trap three, finishing third, beaten by four and a half lengths, with a recorded time of 26.78 seconds. The going was estimated at minus 20. His starting price was 11 to 4. His comments in running were noted as 'lacked early pace, rails to middle'. A pre-race sample, collected by Mr Richardson wearing gloves, was analysed by LGC and found to contain benzoylecgonine and m-hydroxycocaine.

The GBGB presented witness evidence from Professor Tim Morris, who confirmed that benzoylecgonine and m-hydroxycocaine are metabolites of cocaine, a CNS stimulant that could affect a greyhound's performance and well-being. The absence of the parent compound cocaine in the sample suggested exposure was likely more than 4-5 hours prior to the sample being taken. Professor Morris testified that if cocaine was being used to 'start' a dog, its maximal effects would occur sooner than 4-5 hours following dosing. Swab samples taken from a dog food bag and a kennel area door at Mr Richardson's premises on 4th June 2024 showed the presence of cocaine at levels significantly above control levels. A hair sample taken from HURLEYS SPRING on 6th December 2023 was negative for prohibited substances, which Professor Morris stated did not undermine the urine finding.

Mr Richardson suggested potential environmental contamination as the source, noting he frequently exercised the dog in a small, wooded area near a workman's social club known for drug use. When the weather was poor, he would walk the dog on the tarmac path directly outside this club. He stated the dog was always muzzled when outside, except when in the van. He denied any personal use of cocaine and was confident his family members who assisted at the kennels were not users. He explained that the kennel block was always secure, but the yard gate was sometimes left unlocked for deliveries. He

expressed significant distress over the positive sample and stated he had relinquished his licence due to the stress of this event.

The committee concluded it was more likely than not that contamination found in the kennel area was the source of the positive sample, though the ultimate origin of that contamination remains unknown. The committee was satisfied that there was no deliberate administration of cocaine to the greyhound. The committee found breaches of GBGB rules of racing 174(i)(b), 217, and 152(i). No breach of rules 174(i)(a) or 152(ii) was found.

Given the serious nature of the substance in question, a reprimand and a fine of £500 were issued as sanctions. Mr Richardson was counselled that future return to racing would require diligence to prevent any recurrence.

The Disciplinary Committee was in attendance on 19 February 2026.

Those present: -

Dr J Hunt (in the chair)
Ms L Campbell
Mr P O'Dowd

1 **Central Park Stadium: Professional Trainer Mr Barry O'Sullivan (DANGEROUS BRIAN x 2)**

The Disciplinary Committee convened online to consider reports of a local inquiry held by the area stipendiary steward on 13 September 2025 into the positive analysis of a urine samples taken from the greyhound DANGEROUS BRIAN at Central Park Stadium on 29 May and 3 July 2025 which identified the presence of metabolites of norethisterone.

Mr Barry O'Sullivan attended the hearing. Mr Daniel Rankin, Central Park Representative was also in attendance. Ms Carly Philpott, Area Stipendiary Steward, and Professor Tim Morris, Independent Scientific Advisor attended as witnesses.

On 29 May 2025, DANGEROUS BRIAN competed in the 15:01 race, a 491m flat A2 race, at Central Park Stadium. The greyhound finished third with a time of 30.03 seconds. A pre-race urine sample, collected at 13:49 on that date, was analysed by LGC, which confirmed the presence of metabolites of norethisterone. On 3 July 2025, DANGEROUS BRIAN competed in the 16:34 race, a 491m flat A1 race, at Central Park Stadium. The greyhound finished third with a time of 29.89 seconds. A pre-race urine sample, collected at 15:24 on that date, was analysed by LGC, which also identified the presence of metabolites of norethisterone.

Norethisterone is a prohibited substance in male greyhounds; it is a female sex steroid used for oestrous suppression in bitches and has potential anabolic effects.

The Disciplinary Committee heard that at the local inquiry, Mr O'Sullivan stated he believed the greyhound was fed a meal containing a norethisterone tablet intended for one of the bitches by a young part-time kennel hand. He explained that that kennel hand only works on Wednesdays, and Mr O'Sullivan believed that a mix up had occurred.

It was noted that notification of the both findings to Mr O'Sullivan by GBGB was made on 6 August 2025, confirmation of the positive findings in the first sample having been late on 30 June 2025. The Disciplinary Committee heard from Ms Philpott that a follow-up urine sample taken in August 2025, after notification of both findings, was negative.

Professor Tim Morris provided evidence that the analytical findings were true and proper. In the context of the GBGB Rules of Racing, Professor Morris provided evidence that norethisterone is a human medication prescribed to greyhounds for long-term suppression of oestrus and has potential adverse effects in male dogs. It is therefore a substance which could affect performance or prejudice well-being.

Professor Morris explained that based on the analytical data, the two findings were separate events. For the sample of 29 May 2025, the presence of named metabolites made it less likely that the exposure was on the day of sample collection and could have been the day before. For the sample of 3 July 2025, the absence of named metabolites and the presence of only -triol metabolites made it less likely that exposure was on the day or the day before sample collection, and more likely that exposure would have occurred in the days prior.

Mr O'Sullivan stated, in his account to the Committee, that his part-time kennel hand had potentially mixed up the bowls for DANGEROUS BRIAN and his kennel mate, ZOE'S ANGEL, who was receiving Primolut N (containing norethisterone) tablets for oestrus suppression, obtained under prescription from his local veterinary practice. He explained ZOE'S ANGEL is fed inside the kennel due to food aggression, while DANGEROUS BRIAN is fed outside. He described using different types of bowls for dogs and bitches as a rule, though acknowledged they sometimes get mixed up. He stated that he or his daughter prepare the feed, with tablets tucked into the food. Since the incidents, he has stopped using norethisterone for oestrus suppression in all his bitches and has become more vigilant with medication administration.

Based on the evidence presented, the Disciplinary Committee accepted the account of Mr O'Sullivan and concluded that the source of the norethisterone was likely an inadvertent feeding mix-up in the day or two prior to each sample being taken.

The Disciplinary Committee found Mr O'Sullivan in breach of rules 174(i)(b), 217, and 152(i) of the GBGB Rules of Racing.

The Committee noted that Mr O'Sullivan is a long-standing trainer since 1991, Ms Philpott reported that the kennels was a very good family-run business.

The Committee noted Mr O'Sullivan's disciplinary history. In 2009, a disciplinary committee found a positive sample for flunixin, resulting in a reprimand and a £400 fine. In 2021, a positive sample for heptaminol resulted in a reprimand and a £500 fine.

Taking all of these factors into consideration, the Committee imposed a caution and a £100 fine for each positive sample, for a total of £200.

2 **Central Park Stadium: Professional Trainer Mr Mick Mavrias (BARNFIELD HUNTER & FAGANS ROCKY)**

The Disciplinary Committee convened online to consider the report of local inquiries held: on 25 April 2025 into the positive analysis of a urine sample taken from the greyhound BARNFIELD HUNTER at Central Park Stadium on 18 February 2025, which identified the presence of metabolites of norethisterone; and, on 13 May 2025 into the positive analysis of a urine sample taken from the greyhound FAGANS ROCKY at Central Park Stadium on 25 March 2025, which identified the presence of diclofenac.

Mr Mavrias attended the hearing, accompanied by Mr Andrew Green. Mr Daniel Rankin, Central Park Representative was also in attendance. Ms Carly Philpott, Area Stipendiary Steward, and Professor Tim Morris, Independent Scientific Advisor attended as witnesses.

On 18 February 2025 at Central Park Stadium, BARNFIELD HUNTER competed in trial 6, a two-dog trial of 277 metres, running from trap 5. The greyhound finished second in

a time of 17.32 seconds. A pre-trial urine sample was collected at 17:22. The sample was analysed by LGC Health Sciences, and the certificate of analysis confirmed the presence of metabolites of norethisterone.

Norethisterone is a prohibited substance in male greyhounds; it is a female sex steroid used for oestrous suppression in bitches and has potential anabolic effects.

The Disciplinary Committee heard that at the local inquiry, Mr Mavrias stated his only theory was that a bitch in the paddock had previously regurgitated a pill, which BARNFIELD HUNTER then ingested. He noted that the paddocks are shared and BARNFIELD HUNTER is kennelled with another dog not on norethisterone, but other bitches in the same paddock are on the pill.

The Disciplinary Committee heard that kennel records showed daily administration of norethisterone for season suppression to two bitches, and invoices confirmed the purchase of the medication on prescription from the local veterinary practice over several months.

Professor Tim Morris provided evidence that norethisterone is a human medication prescribed for long-term season suppression in bitches and has potential adverse effects in males. It can only legally be obtained on veterinary prescription under the 'cascade' described in the veterinary medicines regulations. He stated the metabolites found were consistent with the ingestion of norethisterone by the male dog, and the findings indicated the exposure was likely in the 12 to 24 hours prior to sampling. He considered Mr Mavrias's theory of a regurgitated pill to be a viable source.

Mr Mavrias stated, in his account to the Committee, that the bitches were already on the pill when he acquired them, and he continued the treatment as they were running well. He explained that he feeds the dogs in separate concrete paddocks and places the pill in the centre of the food bowl for the bitches. He proposed that one of the staff may not have noticed a regurgitated pill on the floor, which was then consumed by BARNFIELD HUNTER during the next feeding rotation. Since the incident, he has stopped using norethisterone pills for season suppression entirely.

Based on the evidence presented, the Disciplinary Committee accepted the account of Mr Mavrias and concluded that there was no deliberate administration, but considered that something had clearly gone awry in processes which meant that BARNFIELD HUNTER was exposed to the medication.

The Disciplinary Committee found Mr Mavrias in breach of rules 174(i) b, 217, and 152(i) of the GBGB Rules of Racing.

The Disciplinary Committee also considered the matter of FAGANS ROCKY.

On 25 March 2025, FAGANS ROCKY competed in race one (18:14) at Central Park Stadium, a 277-metre flat race, grade D2. The greyhound finished fifth by four and a quarter lengths in a time of 17.14 seconds. A pre-race urine sample was collected at 18:03 on 25 March 2025. The LGC certificate of analysis identified the presence of diclofenac.

The Disciplinary Committee heard that at the local inquiry, Mr Mavrias stated he uses Voltarol (diclofenac) gel for his own back pain and also takes Arthrotec tablets, which contain diclofenac and misoprostol. He also administers Voltarol gel twice daily to a family member. He proposed the positive finding was due to unintentional cross-contamination as a result of handling the dogs with the substance still on the skin of his hands.

Ms Philpott reported that the form lines for FAGANS ROCKY showed the dog was running regularly and to form around the time of the positive test, with no indication of injury. An injury was recorded on 14 April 2025 following a fall in a race, which was some time after the positive sample.

Professor Tim Morris provided evidence that diclofenac, a non-steroidal anti-inflammatory drug, is not used for veterinary treatment in dogs, and can cause gastrointestinal ulceration and bleeding. Professor Tim Morris confirmed that diclofenac is a substance that could affect performance or prejudice the well-being of a greyhound. He noted that there are a number of findings where diclofenac gel has been a source of the substance in urine. He also noted that Arthrotec tablets contain diclofenac and are another possible source. He stated that the most likely source of the finding was from the trainer's personal medical use.

Mr Mavrias stated, in his account to the Committee, that he uses the Voltarol gel at the kennels in the kitchen area as and when needed for pain, if he has started work early he may also have tablets present in the kitchen area. He confirmed that since the positive finding, he has changed his procedures. He now wears latex gloves when administering topical gels, and also wears gloves for feeding the dogs and when treating them. He has also increased his handwashing frequency.

Based on the evidence presented, the Disciplinary Committee accepted the account of Mr Mavrias and concluded that there was no deliberate administration but considered that something had clearly gone awry in processes, which meant that FAGANS ROCKY was exposed to the medication.

The Disciplinary Committee found Mr Mavrias in breach of rules 174(i)(b), 217, and 152(i) of the GBGB Rules of Racing.

The Committee noted the changes Mr Mavrias has implemented to prevent a recurrence and his cooperation with the inquiry. The Committee advised Mr Mavrias to have a conversation with his staff to reinforce the importance of reporting any personal medication use and to use gloves to prevent cross-contamination.

The Committee noted Mr Mavrias's disciplinary history, which included a previous disciplinary committee appearance in 2022 for a positive sample of codeine, norcodeine, and oripavine, resulting in a caution and a £200 fine.

Taking all of these factors into consideration, the Committee imposed a sanction of a caution and a £100 fine for the breaches related to BARNFIELD HUNTER, and a caution and a £200 fine for the breaches related to FAGANS ROCKY.
